Art Unit: 1623

Claims 22-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The terminology "R1, R2, R3 or R4 groups containing 1 to 12 carbon atoms" and "but not 1,2,8-trihydroxy-3-methyl anthraquinoline or 1,8-hydroxy-3-R-anthraquinone where R is methyl, hydroxyl, hydroxymethyl or COOH" (claim 22) is not disclosed or suggested by the specification as originally filed. Note that on page 6 of the specification it is stated that "R is a group containing 1 to 12 carbon atoms". However, the specification does not state how many carbon atoms are in R1, R2, R3 and R4.

Claims 22-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims have been limited to the carbon containing groups containing 1 to 12 carbon atoms. However, it is not clear how groups, such as alkene, alkyne, aryl and carbohydrate can have 1 carbon atom.

Applicant's arguments filed October 22, 2004 have been considered but have not been found persuasive insofar as the above rejections relate to the claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1623

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Chemical Abstract 120:212583 or the Chemical Abstract 130:110478.

Each of the chemical abstracts discloses a compound encompassed by the instant claim.

Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
